International Journal of Theoretical Physics

Volume 25, Number 1 January 1986

CONTENTS

An Estimation of the Fine Structure Constant Using Fiber Bundles 1
D. K. Ross

Topological Geometrodynamics. III. Quantum Theory 7
Matti Pitkänen

Space-Time Groups for the Lattice 55
Miguel Lorente

Kronecker Products of Matrices and an Application to Fermi Systems 67
C. M. Villet and W.-H. Steeb

Propagator for the Anisotropic Three-Dimensional Charged Harmonic Oscillator in A Constant Magnetic Field Using the Schwinger Action Principle 75
L. F. Urrutia and C. Manterola

Rotational Relativity Theory 89
M. Carmeli

Asymptotic Thermodynamic Criteria for the Persistency of Metastable States 95
B. H. Lavenda and C. Cardella

BOOK REVIEWS 113

International Journal of Theoretical Physics

Volume 25, Number 2 February 1986

CONTENTS

Toward Finite Quantum Field Theories 117
S. Rajpoot and J. G. Taylor

Composite Variational Principles, Added Variables, and Constants of Motion 139
Giacomo Caviglia

Exact Solutions for Stimulated Emissions by External Sources 147
Edward B. Manoukian

Feynman Path Integrals in the Young Double-Slit Experiment 159
H. Yabuki

Relativistic Orbital Perturbations in a Weak Gravitational Field 175
J. M. Gambi and A. San Miguel

Cosmic Lorentz Transformation 195
M. Carmeli

Almost Periodic Solutions to $SO(2,1)$ σ-Model Field Theory 199
A. Roy Chowdhury and Shankar Basak

Variational Approach to the Hamiltonian Structure of a New Hierarchy of Nonlinear Equations 207
A. Roy Chowdhury and Swapna Roy

International Journal of Theoretical Physics

Volume 25, Number 3 March 1986

CONTENTS

Quantum Gravity and the Statistical Interpretation of Quantum Mechanics 215
Lee Smolin

Constructive Description of the Compact Set of States 239
A. Posiewnik and J. Pykacz

Rishon Constituents of Higher-Generation Leptons and a Global Conservation Law 247
S. N. Das

Toward a Comprehensive Theory for He II. I. A Zero-Temperature Hybrid Approach 255
H. B. Ghassib and A. M. Khudeir

Toward a Comprehensive Theory for He II. II. A Temperature-Dependent Field-Theoretic Approach 273
J. Chela-Flores and H. B. Ghassib

Cosmology with Time-Varying G 293
Antonio Alfonso-Faus

Lie-Backlund Vector Fields for the Nonlinear System $Q_t = AQ_{xx} + F(Q_x, Q)$ 319
A. Roy Chowdhury and Shibani Sen

International Journal of Theoretical Physics

Volume 25, Number 4 April 1986

CONTENTS

Kaluza, Klein, Confinement, and Nuclear Forces 327
M. W. Kalinowski

ISO(3, 1) Gauge Theory of Gravity 347
Shao Changgui and Xu Bangqing

Spin(8) Gauge Field Theory 355
Frank D. (Tony) Smith, Jr.

Physical Structure of the Energy-Momentum Tensor in General Relativity 405
G. S. Hall and D. A. Negm

New Approach to Einstein–Petrov Type I Spaces. II. A Classification Scheme 425
S. B. Edgar

What is an Elementary Physical Object? A System-Theoretic Approach 435
L. Szabó

Hyperspin Manifolds 441
David Finkelstein, Shlomit Ritz Finkelstein, and Christian Holm

International Journal of Theoretical Physics

Volume 25, Number 5 May 1986

CONTENTS

This issue contains papers presented at the Third Loyola Conference on Quantum Theory and Gravitation, May 29–June 1, 1985

Part 1

Introduction to the Third Loyola Conference on Quantum Theory and Gravitation 465
A. R. Marlow

Some Problems of Our Natural Sciences 467
E. P. Wigner

Quantum Theory of Fields and Origin of Gravity 477
Erast B. Gliner

Gauge Group of Gravity, Spinors, and Anomalies 493
R. Percacci

Scalar Manifolds and Jordan Pairs in Supergravity 509
P. Truini

Quantum de Sitter Fiber Bundle Interpretation of Hadron Extension 527
R. R. Aldinger

Why Is the Universe So Large? 545
Don N. Page

Symplectic Manifolds, Coadjoint Orbits, and Mean Field Theory 553
George Rosensteel

Quantum Theoretical Origin of Spacetime Structure 561
A. R. Marlow

International Journal of Theoretical Physics

Volume 25, Number 6 June 1986

CONTENTS

This issue contains papers presented at the Third Loyola Conference on Quantum Theory and Gravitation, May 29–June 1, 1985

Part 2

Boundary of a Boundary Principle and Geometric Structure of Field Theories 573
Arkady Kheyfets and John A. Wheeler

Curvature Calculations with Spacetime Algebra 581
David Hestenes

Spinor Approach to Gravitational Motion and Precession 589
David Hestenes

Equivalence of the Degrees of Freedom in a Unified Gravitational Theory 599
Leopold Halpern

Cosmological Limits on Computation 617
Frank J. Tipler

International Journal of Theoretical Physics

Volume 25, Number 7 July 1986

CONTENTS

Scale Invariance, Killing Vectors, and the Size of the Fifth Dimension 663
D. K. Ross

Direct Gauging of the Poincaré Group V. Group Scaling, Classical Gauge Theory, and Gravitational Corrections 671
Dominic G. B. Edelen

Classical Particle Dynamics in Quantum Space 685
M. Dineykhan and Kh. Namsrai

Searching for Light Higgs Scalar Bosons in Next Generation of Electron–Positron Collider at LEP 701
G. C. Chukwumah

Use of Catastrophe Theory to Obtain a Fundamental Understanding of Elementary Particle Stability 711
Paul D. Tinari

Energy-Momentum Vector of the Classical Electron 717
Jeffrey M. Cohen and Errol Mustafa

Proca and Electromagnetic Fields 727
P. Hillion and S. Quinnez

Structure of the Primary Hamiltonian Constraints for a Singular N-Body Lagrangian 737
Andrea Raspini

Physical Properties of Some McVittie Metrics 741
Henning Knutsen

Magnetized Cosmological Model 755
Raj Bali

Stokes Phenomena and Monodromy Deformation Problem for Nonlinear Schrodinger Equation 763
A. Roy Chowdhury and Minati Naskar

International Journal of Theoretical Physics

Volume 25, Number 8 **August 1986**

CONTENTS

Generalization of the Dirac Equation Admitting Isospin and Color Symmetries 779
Jaime Keller

Quantum Graphics 807
Stanley Gudder

Uncertainty Principle Limits on the Cosmological Constant 825
C. Sivaram

Superposition and Quantum Mechanics 829
Jack Cohn

Critical Investigation of Jauch's Approach to the Quantum Theory of Measurement 863
Fedor Herbut

Non-Time-Orientable Lorentzian Cobordism Allows for Pair Creation 877
Rafael D. Sorkin

Linear Perturbations of Gauge Fields 883
G. F. Torres del Castillo

Dynamical Transformations and Information Systems 891
Andrzej Posiewnik

New Look at the Large Numbers 897
Thomas Görnitz

Response to Kowalczński about Tachyons 905
Erasmo Recami

International Journal of Theoretical Physics

Volume 25, Number 9 September 1986

CONTENTS

Toward a Quantitative Theory of Self-Generated Complexity 907
Peter Grassberger

Characterization of Projection Lattices of Hilbert Spaces 939
Horst H. Szambien

$SU(2,2|N) \cdot \langle N' \rangle$ Superunified Theory 945
Shao Changgui, Xu Bangqing, and Guo Youzhong

Analytic Structure of Gauge Fields 959
J. T. Anderson

Quantum Topological Geometrodynamics 973
Matti Pitkänen

International Journal of Theoretical Physics

Volume 25, Number 10 October 1986

CONTENTS

Quantum Space-Time and Gravitational Consequences 1035
Kh. Namsrai

New Framework for the Feynman Path Integral 1075
Shaharir bin Mohamad Zain

Subsidiary Conditions of the General Gel'fand-Yaglom Wave Equation Based on the Representation $(1/2, 3/2)\oplus(-1/2, 3/2)\oplus(1/2, 5/2)\oplus(-1/2, 5/2)\oplus(1/2, 3/2)\oplus(-1/2, 3/2)$ 1095
C. G. Koutroulos

$SU(2)_L \times SU(2)_R \times U(1)$ Gauge Model 1105
Chandra Raju

Generalization of Maeda's Theorem 1117
Anatolij Dvurečenskij

Hadron Fields from Anisotropic Space and Their Interaction 1125
S. S. De

Some Harmonic Maps on Pseudo-Riemannian Manifolds 1139
A. P. Whitman, R. J. Knill, and W. R. Stoeger

International Journal of Theoretical Physics

Volume 25, Number 11 November 1986

CONTENTS

Conditional Probability on a Quantum Logic 1155
Olga Nánásiová

Physical Consequences of Quantized Fiber-Bundled Space 1163
M. Dineykhan

Vacuum Expectation Values of the Energy-Momentum Tensor in Two Dimensions 1175
Waldemar Biernacki and Andrzej Królak

Boson Representations of Symplectic Algebras 1181
A. I. Georgieva, M. I. Ivanov, P. P. Raychev, and R. P. Roussev

Boson–Fermion Duality in Four Dimensions: Comments on the Paper of Luther and Schotte 1193
Piotr Garbaczewski

Christoffel Formula and Geodesic Motion in Hyperspin Manifolds 1209
Christian Holm

International Journal of Theoretical Physics

Volume 25, Number 12 **December 1986**

CONTENTS

Separability in Distant Jauch-Type Hybrid Macrostates of a Quantum and a Classical System 1215
Fedor Herbut

Big Bang As the Collapse of an Ordered Spin System 1229
Carl Wolf

Orthogonal Harmonic Polynomials on $U(2)$ 1235
E. Donth and O. Lange

Scaling and s-Channel Helicity Conservation via Optimal State Description of Hadron–Hadron Scattering 1257
D. B. Ion

Magnetic Monopole Interactions: Shell Structure of Meson and Baryon States 1281
David Akers

Variable-G Cosmology and Creation 1295
Aroonkumar Beesham
